TECHNICAL SKILLS

Python, Flask, JavaScript, TypeScript, React, Next.js, HTML, CSS, C++, SQL, PostgreSQL, SQLAlchemy, Supabase, Git, GitHub, React Native, Expo, Accessibility WCAG 2.1

EXPERIENCE

Résumé — Software Engineer | Jul 2025–Present

- Partner with PM and Design to turn usability findings into scoped tickets and shipped code
- Implement and refactor React features, model data flows with Supabase/Postgres, harden forms
- Lead accessibility cleanups to WCAG 2.1, improve screen-reader and keyboard paths
- Write unit/E2E tests, review and merge PRs, track and resolve regressions across staging and prod

Next Chapter — Software Engineering Apprentice | Jul 2023–Jan 2024

- Full-scholarship apprenticeship in full-stack development
- Built REST features with Python/Flask and React, modeled data with PostgreSQL/SQLAlchemy
- Wrote unit tests, used branches/PRs/code reviews, and delivered demo-ready builds

TECHNICAL PROJECTS

Flatiron-Hackonomics — AI-driven personal finance platform | Mar 2024

- Led GitHub Projects for 50+ issues, coordinated FE/BE/UI to hit milestones
- Built transaction dashboard for 500+ sample records; designed receipt-scan feature

ShoeHaven — Full-stack e-commerce app | Jan 2024

- React front end, Flask API, SQLAlchemy ORM, JWT auth, validations, REST routing

EDUCATION

De Anza College — Aug 2024–Present

- Computer Science coursework toward MSCS preparation

Flatiron School — Sep 2023–Jan 2024

- Full Stack Web Development, full-time training and team builds

Ohio University — Sep 2019–Apr 2022 — GPA 3.48

- Bachelor of Specialized Studies in Strategic Communication & Business
